

FNB SALES PERFORMANCE REVIEW

Presented by Nompumelelo Nsibande

EXECUTIVE SUMMARY

This presentation provides an overview of the company's sales performance based on transactional data analysis.

The objective was to identify key business trends, profitability challenges, and opportunities to improve financial performance.

Presentation focus:

- Overall sales performance
- Profitability
- Sales trends
- Key findings
- Strategic recommendations

EXECUTIVE DASHBOARD

This dashboard provides an executive overview of our sales performance. It summarizes our total sales, total cost of sales, gross profit, monthly sales trends, quarterly profitability, and overall profit performance.

KEY BUSINESS FINDINGS

Although sales volumes remain strong, the business is not converting revenue into profit.

01

Total Sales

The company generated approximately R186.91 million in sales.

02

Cost of Sales

Total Cost of Sales reached R194.03 million, exceeding total sales.

03

Gross Profit

Gross Profit is approximately -R7.12 million, indicating the company operated at a loss during the reporting period.

SALES TRENDS

Insight

- Sales remained relatively stable throughout the year.
- Peak sales occurred during several months, while others experienced noticeable declines.
- This suggests seasonal demand patterns that can be leveraged for planning inventory and marketing activities.

PROFITABILITY ANALYSIS

Findings

- Gross Profit remained negative across the reporting period.
- Quarter 2 contributed the largest financial loss.
- Profitability continued to decline over time.

Our greatest concern is profitability rather than sales generation.

STRATEGIC RECOMMENDATIONS

Recommendation 1

Review product pricing to improve profit margins.

Recommendation 2

Reduce procurement and operational costs.

Recommendation 3

Investigate why the Cost of Sales exceeds revenue.

Recommendation 4

Increase marketing investment during high-performing months to maximize revenue.

Recommendation 5

Implement monthly executive dashboards to monitor profitability and respond quickly to performance changes.

CONCLUSION

Summary

Our analysis shows that the business generates strong revenue but is currently operating at a loss due to high costs. By focusing on cost optimization, pricing strategies, and continuous performance monitoring, the company can improve profitability while maintaining strong sales performance.

THANK YOU
